TIMBER
WINDOWS

ENHANCE THE BEAUTY & VALUE OF YOUR *home*

Timber Windows has developed the country's finest network of specialist,
local showrooms dedicated to the supply and installation of beautiful
timber windows and doors.

WE ARE PASSIONATE ABOUT WOOD AND
SINCE OUR LAUNCH OVER TEN YEARS
AGO, OUR SUITE OF PRODUCTS HAS LEAD
THE MARKET IN THE BREADTH OF
APPLICATION, UNIQUENESS OF DESIGN,
QUALITY OF CONSTRUCTION AND
PERFORMANCE IN USE.

Attention to detail is a hallmark we are proud of. Our collection has been
carefully and sensitively tailored to complement the English home -
whether you live in a period villa, a barn conversion or a more modern
property in need of contemporary flair. Unlike timber windows of old,
our products will not twist, will not rot and require very little
maintenance. High levels of insulation and security ensure there is no
need to sacrifice beauty for comfort.

The Timber Windows service is delivered with care by knowledgeable
local specialists whose reputation is built on providing an attentive service
from initial enquiry to the completion of your project. Our local
showrooms provide the perfect environment to browse the many
options available, with expert guidance on hand to help you make
an informed decision.

Installing well-made, well-specified timber windows and doors can really
enhance the beauty and value of your home. We look forward to working
with you on your exciting project!

TIMBER
WINDOWS

THE TIMBER WINDOWS STORY

The original engineered timber windows & doors – incredible innovation

At the start of the new century the founders of Timber Windows were confronted by a problem. They knew that discerning homeowners preferred timber windows & doors to cheaper plastic or aluminium alternatives, yet there were no timber products capable of delivering lasting performance.

Finding the answer took Timber Windows on a journey that turned the timber window & door industry on its head. Combining Scandinavian techniques with German engineering, the company introduced high quality products manufactured in engineered timber, a material never seen before in the UK.

This revolutionary approach enabled the development of an incredibly innovative range of timber windows & doors - and shaped the ongoing success of Timber Windows as a business. With beginnings in just a single high street shop, the network now spans more than thirty-five beautiful showrooms, dedicated to transforming the homes of discerning owners across the country.

IT'S ALL SUSTAINABLE, SO DOESN'T HARM THE EARTH

We offer a range of Forest Stewardship Council (FSC) Certified timbers for your windows and doors, including Meranti Hardwood and European Oak.

However over 80% of Timber Windows customers choose European Redwood – our favoured alternative. The longevity of this strong, knot free, stable timber is well proven in the United Kingdom.

European Redwood is the timber used by the British joiners of yesteryear – most 100 year old British joinery was originally made using European Redwood.

All of our Redwood derives from sustainably managed plantations in Northern Europe, which means that when trees are felled, new ones are always planted to replace those harvested.

In fact European forest areas are now expanding by around 5000 sq. km each year. These forests are also healthier for the environment, removing Co2 from the atmosphere and storing it in their trunks.

So when you choose your new Timber Windows you will not harm the Earth.

ENGINEERED TIMBER TRADITIONAL WOOD

Making the right choice

Traditional wood is both beautiful and tactile. For many centuries it has been the material of choice for windows and doors throughout Britain and Europe. But traditional wood has innate problems - a natural tendency to expand and contract, and when wet, to warp in the direction of the grain resulting in windows and doors that twist and stick, causing frustration for homeowners.

Engineered, or multilayer timber, is an innovative solution that counteracts these issues. It is created by layering wood sections, with the grain of one section of wood layered in the opposing direction to the grain of its neighbour.

As wet wood has a tendency to warp in the direction of the grain, layering the wood in this way ensures that any movement caused by the absorption of moisture is evened out. So engineered timber is stronger, longer lasting and resistant to the issues that affect traditional wood. Windows and doors made with engineered timber retain their strength and structure, ensuring that they remain a perfect fit, just as they did on the day they were installed.

Using engineered timber ensures that there is no warping or twisting, sticking or rubbing, no matter how damp the prevailing atmospheric conditions. This makes it the perfect choice for every area of the UK - no matter how exposed the location.

Finished by hand

Engineered timber is also far easier to work with. It can be used to meet the design specifications of complex windows and doors much more efficiently than solid wood, yet retaining all of its natural appeal. And whilst state of the art computer controlled machinery inevitably plays its part, all of our engineered timber windows and doors are hand finished before being subjected to rigorous quality control, with every aspect of the construction and glazing fully checked and re-checked.

So put us to the test - visit one of our Timber Windows showrooms and see for yourself how timber has changed.

10 REASONS TO CHOOSE TIMBER WINDOWS

1 Factory applied micro-porous coatings providing maximum protection but minimal maintenance

All of our windows and doors are factory painted prior to assembly, providing complete protection from moisture absorption and maximising longevity. Every product receives a base coat of timber preservative, then a primer coat, followed by two coats of microporous paint. You should expect our coatings to last from five to eight years without the need for re-treatment. Should you wish to change the colour of your windows then redecoration is a very simple task as there is no sanding down required. An average window should take about thirty minutes to redecorate.

2 Internal beads for security

Glass is fitted from room side to prohibit would-be intruders from gaining entry by removing the glass.

3 Neat, coloured silicone seals

Purpose-made grooves on the inside and outside of the window receive the silicone necessary to protect against water ingress. Appropriate coloured or clear silicone is factory applied, guaranteeing a perfect, unobtrusive seal.

4 Ventilation channels help prevent double-glazing from misting

Ventilation channels protect against the failure of double glazed units. In standard systems misting can occur when glazing units are allowed to sit in water trapped within the frame.

5 Multi-layer timber sections with opposing grains, balances warping and combats twisting

The use of multi-layer timber for windows and doors is long established in Scandinavia and Northern Europe, but very rare in Britain. The multi-layer structure used as standard throughout our range is particularly effective in resisting warping and twisting, as the opposing grains even out natural moisture movement. It is the twisting of timber during wet weather, more than the swelling itself, which causes standard wooden windows and doors to stick.

6 Glazing units almost twice as effective as ordinary double glazing

All of our windows and doors incorporate double-glazed units with enhanced thermally insulating glass, providing an extremely low U-value. We further improve the efficiency of the unit by filling the cavity with argon gas and using low conductivity spacer bars to minimise edge losses. The result is a 1.1 W/m²K centre pane U-value. This means an 80% increase in energy savings compared to single glazing, and a 45% increase in energy savings compared to ordinary double-glazing.

7 Exceptional optical clarity

Advanced glass technology not only provides enhanced thermal performance but also much improved clarity, particularly compared to traditional hard coated low e glasses. High light transmittance (77%) maximises the entry of natural light into the home.

8 Warm edge spacer bars

Low conductivity spacer bars help to minimise heat loss and combat condensation levels on the inner pane.

9 Rebated glazing beads eliminate unsightly gaps between the frame and bead

In standard timber systems, paint is prone to cracking at the point where the bead meets the window frame. By rebating the glazing bead over the sash we conceal the joint, which eliminates the problem.

10 Security

All Timber Windows are fitted with advanced security locks that wrap around the openers on our Flush Casements and engage bolts in multiple points on our Lipped Casements. Doors are fitted with multi-point locking mechanisms, featuring hook-bolts and deadlock.

Effortless

CASEMENT WINDOWS

DECO

Specially designed sections are added to the front face of the window, which allow the opening sashes to appear recessed within the frame. An important detail common to the inter-war period of the 1930's, the stepping back of the sashes provides a degree of modelling to the façade of urban homes.

COTTAGE

Through the use of slimmer sections and designing out the need for vertical mullions, the Cottage flush casement allows approximately ten percent more light into the building, ideally suited to traditional cottages and the replacement of their smaller, finely constructed original windows.

Closely matched to Farrow & Ball "Old White".

Light Oak stain.

French Grey.

Off-White.

FLUSH

Closing into the frame and giving a flush finish across the face of the window, this simple yet elegant design can be found in most mediaeval buildings, cottages and houses of all periods.

LIPPED

With a casement that slightly overlaps the face of the frame when closed, this design may offer additional protection against the elements in areas of extreme exposure and are the most widely used window design in England.

Maximising

K E R B A P P E A L

Some say that looks are everything. Certainly when it comes to property, it is outward appearance - or kerb appeal - that helps seal the deal.

When buying a home it apparently takes no more than eight seconds for potential buyers to decide whether or not they like a particular house - that's about the time quick readers have spent on this page!

But if there is one thing that we have learned over the years about Timber Windows customers it is that whilst they really care about how their homes look, they are just as concerned about how they are made.

It is not difficult to find properties, even in your own street, where the replacement windows and doors really do not suit the original look of the house. This is often exacerbated by the choice of man-made materials, as much as their design.

Choosing well should be at the heart of any decision to replace windows and doors. Many of our customers ask us to faithfully copy the design of the original timber windows and doors, even providing archive photographs as source material. Other customers sense the opportunity to use our portfolio of products to create something

stunning of their own - perhaps by pairing beautiful sash windows with a contemporary front door, or by opening up a living room to garden with bi-fold or french doors.

Whichever route you choose, Timber Windows will provide designs and layouts that enhance the facade of your home, give you a host of colour and finishes to choose from, all combined with exceptional levels of timber performance.

Glorious

SASH WINDOWS

Glorious

SASH WINDOWS

Sash windows grace some of the most beautiful homes in the country - and replacing these originals, when the time comes, is a Timber Windows speciality.

Our unique collection of sash windows faithfully replicate these timeless designs down to the finest details and includes the slimmest traditional box sash available in the UK, as well as more specialised solutions for listed buildings and conservation areas.

Glorious to behold, easy to slide and constructed to deliver the highest standards of insulation, security and longevity, our Sash Windows are available with traditional chains or a hidden spring mechanism.

Browse the following pages to see how sensitively replaced Sash Windows can add real character to a property.

SIGHTLINES

Providing balance & visual impact

Well-thought out sightlines can make all the difference to the visual impact of your property. Wherever possible, the horizontal lines formed by window bars should match up across the windows and doors of the property. The annotated illustration above shows this design 'trick' more clearly.

This works particularly well for double-fronted houses with central front doors, but can also smarten semi-detached and terraced homes considerably, bringing balance and elegance. We can also ensure that any non-opening (or dummy) sashes are in-line with those that do open.

Whilst grand buildings - especially from the Georgian period - conjure this design feature effortlessly, the good news is that your local Timber Windows showroom will include this as part of your project, advising on how best to bring balance to the look of your home's new windows and doors.

COLOUR CHOICES

Decisions, decisions...!

So what are you thinking? Traditional smart white, elegant black or something less obvious and more individual? It may be a sign of the times, but just 40% of our orders are for white windows. And with hundreds of different colour shades to choose from, along with classic timber stains, you are most definitely spoilt for choice.

COLOUR MATCHING SERVICE

Our close matching service to colours from the Farrow & Ball and Fired Earth paint ranges allows you to co-ordinate your windows & doors with the interior scheme. Remember that dual colour is also possible, with frames finished in different shades internally to externally.

Timber Windows also provide the option for multiple colours - outside and in - so you can match the internal frame to your room decor.

STANDARD COLOURWAYS

To make life easier our Choices brochure includes our 35 most popular colours.

RAL COLOUR OPTIONS

In addition to our standard colour range our products are available in any colour from the RAL Classic range, providing a further 210 shades for you to choose from.

STAIN OPTIONS

Due to the natural variance of the timber in colour and texture, stain finishes can vary from one piece of timber to another. Stain finishes are fantastic but we are unable to guarantee a complete colour match either in installations carried out at the same time or in staged time installations.

See paint colour & finishes in
CHOICES brochure.

Make an

ENTRANCE

By looking at front door designs around the country we built a collection suitable for every kind of home. On the following pages you will see Entrance Doors with glazed panels, those suitable for conservation areas, smart panelled doors, practical stable doors and sharper, more contemporary styles.

Whichever style you choose, every door is hung on robust, fully adjustable hinges, colour co-ordinated to the door threshold. Security is assured with robust multi-point locking mechanisms, featuring hook bolts and deadlock which meet Secure By Design standards.

Your local Timber Windows showroom will also advise you on the layout of your Entrance Door, including the positioning of ironmongery - we have an extensive range which includes elegant period handles, traditional letter plates and knockers, including our beautiful Samuel Heath collection.

A selection of decorative glass options, based on authentic Victorian stained glass motifs, has been uniquely commissioned for the range. These may be selected from a variety of colour palettes to complement the door colour or finish.

Our Entrance Doors are also available as a Town House door with no external handle, an escutcheon plate at eye level which replicates the look of a traditional mortice lock and a centre pull knob.

Our architect designed Contemporary Entrance Doors are available in eleven styles to complement modern properties, or add individuality to a period home. The doors feature clean, understated lines, finished with crisp modern ironmongery. An etched glass effect may be chosen to provide privacy, including an option to have your house number reversed out.

Every style of Entrance Door is available hand-finished in hundreds of traditional shades and timber stains, including RAL colours and a close matching service to colours from the Farrow & Ball and Fired Earth paint ranges. We also offer the option to vary the colour on the inside of the door, so that it can match your internal decor.

All of our doors use multi-layered, warp and twist resistant timber throughout their construction, with high specification glazing fitted as standard. Factory applied paint finishes ensure a long life with very low maintenance.

CONSERVATION

The Timber Windows range includes a host of window & door options to improve your home. For most of our customers, the style of their property will inform the design choices they make, so whether you live in a period home or something more contemporary we can help enhance both

appearance and performance. When it comes to conservation areas we have proven experience in helping to restore the original character of a property through carefully selected windows & doors, always with an eye to any planning considerations. We can also provide advice on the fine

details of glazing, hardware and colour, helping you to make your property authentic to the area. In locations with more design freedom then we can help bring your ideas to life, balancing design and practicality to enhance your home, whilst still maintaining traditional looks.

CONTEMPORARY STYLES

Timber has proven to be the perfect material for contemporary style windows and doors, characterised by clean profiles and lines. Stylish stainless steel hardware choices and an extensive colour palette echoing today's preferences enable you to achieve the looks you want combined with

exceptional timber performance. Etched and patterned glass for front door panels, even incorporating your house number or name, can help add personality. And in locations where there is more latitude for creativity Timber Windows can help to combine elements of both our traditional

and contemporary ranges in a single unique look - perhaps by pairing beautiful sash windows with a contemporary front door. Whatever your inspiration or aspiration your local Timber Windows showroom will work with you, guiding and advising you through the options.
