GRiPCORE®

COLLECTION

INTRODUCING THE GRiPCORE COLLECTION

A well designed door adds beauty, style and personality to your home. So, whether you prefer a traditional or contemporary look, there is a door style to suit all tastes from our GRiPCORE Collection.

GRiPCORE technology is created from the best of traditional and modern materials, and is engineered to deliver a stronger, heavier and more robust door.

The unrivalled construction of GRiPCORE door technology creates a formidable barrier that will protect your home against the elements, deter intruders and look stunning for years to come.

A NEW GENERATION OF COMPOSITE DOORS

In a first for the UK market, the new GRiPCORE timber-foam core is made up of layers of PIR foam and HDF plywood, compressed between two sheets of aluminium to add extra stability and rigidity. Finished with a signature GRP skin, GRiPCORE is simply superior to anything else currently on the market.

The brand new core composition pairs PIR foam with HDF plywood and sheets of aluminium for a first in composite door engineering.

1 PIR FOAM

Providing excellent thermal capabilities, far exceeding XPS foam as commonly used.

2 HDF sheets

This high-density product exceeds that of plywood providing brilliant rigidity and strength throughout.

3 Aluminium sheet

This is a vital layer within the door construction, it adds stability to the door but also protects against moisture infiltration.

4 Exterior grade plywood

Additional sheet for door support under the GRP skin.

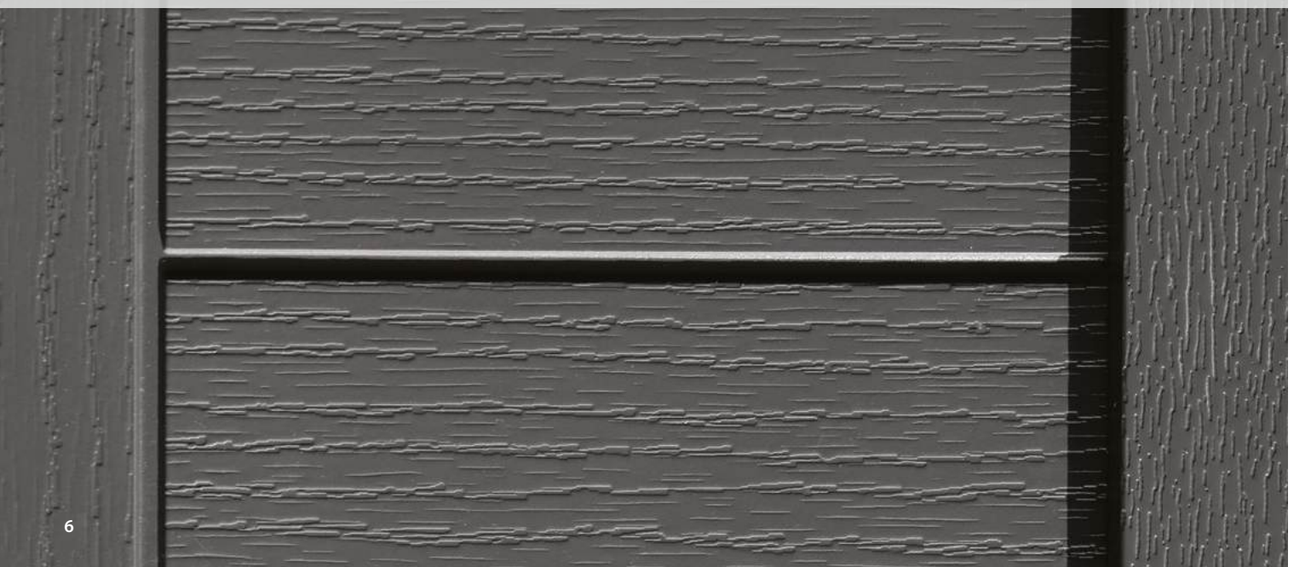

5 GRP skin

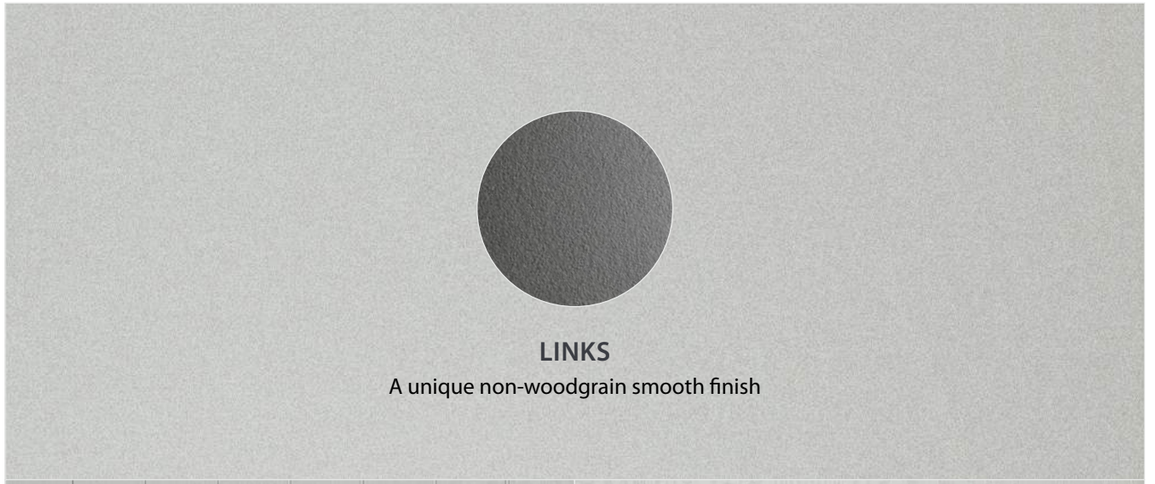

The GRP skins are pressed onto the core with a unique method to ensure flawless correlation with the core.
